Total number of hits satisfying chosen parameters: 283224

Minimum DB seq length: 0
Maximum DB seq length: 2000000000
```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

endothelin converting enzyme (EC 3.4.24.-) 2 - bovine (fragment)
C;Species: Bos primigenius taurus (cattle)
C;Date: 16-Aug-1996 #sequence_revision 16-Aug-1996 #text_change 20-Sep-1999
C;Accession: I46078
R;Emoto, N.; Yanagisawa, M.
J. Biol. Chem. 270, 15262-15268, 1995
A;Title: Endothelin-converting enzyme-2 is a membrane-bound, phosphoramidon-sensitive in A;Reference number: A57042; MUID:95318093; PMID:7797512
A;Accession: I46078
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Š
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Q

T24949

hypothetical protein T16A9.4 - Caenorhabditis elegans
C;Species: Caenorhabditis elegans
C;Date: 15-Oct-1999 #sequence_revision 15-Oct-1999 #text,
C;Accession: T24949
R;McMurray, A.
submitted to the EMBL Data Library, July 1996
A;Reference number: Z19959
A;Accession: T24949
A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Molecule type: DNA
A;Residues: 1-769 <WIL>
A;Residues: 1-76
